

AST Turbo is an independent service provider company in the Hydrocarbon Processing Industry and the Energy sector. Our employees provide services on critical rotating equipment to some of the biggest companies of the world within the Oil & Gas and Energy sector. Headquartered in Altendorf (SZ), Switzerland, the firm has an office in Houston (TX) and several agencies all over the world.

We are a young, internationally oriented and innovative company with a flat management structure and quick decision-making. Our strength and our success result from the combination of long-term orientation and entrepreneurial thinking at all levels. We are looking for employees with passion and commitment who want to shape the future in the Rotating Equipment Industry with us.

To strengthen our team, we are looking for a

Field Service Project Manager

Job Information

The Field Service Project Manager will provide after sales services under the direction of the Operations Manager. This role is called to lead and manage the on-site activities of multi-equipment turnarounds of critical rotating equipment at customer's sites in the Oil & Gas and Energy Industry. As the lead AST Turbo representative on site, this role will manage and pro-actively support the AST execution team, handle the communication and coordination of activities with the customer, sub-contractors, and other project stakeholders.

In addition to leading multi-equipment turnarounds, this role acts as Service Engineer on overhauling and new installation projects providing technical advice and hands-on supervision to the executing crews.

The Field Service Project Manager assures that the work is carried out in accordance with the customer's expectations or specifications while ensuring that safety, environmental and quality policies are adhered to.

Education / Experience

For this position, you will have at least 5 years of practical work experience in a similar function preferably gained with an OEM or an independent service provider in the Oil & Gas Industry. Ideally you have a bachelor degree in mechanical engineering or completed an apprenticeship as mechanic (truck or construction machinery). Profound hands-on experience with steam turbines and centrifugal compressors is required. Experience with gas turbines and pumps would be a plus.

Special Requirements

- > Male, Age 30 – 55 years
- > Based in Switzerland or Europe, preferably with CH or EU passport
- > Good skills in MS Office (Word, Excel, Power Point)
- > Fluent language skills in English, spoken and written
- > Self-motivated, with the ability to work independently
- > Honest and loyal (long term employment expected)
- > Willingness to travel (international, short and long-term assignments), approx. 160-180 days worldwide
- > Excellent communication & interpersonal skills and the ability to lead and manage a team
- > Relevant professional experience in the Oil, Gas and Energy sector
- > Respect for different cultures
- > Customer and service focused attitude
- > Mechanical aptitude and skills
- > Ability to get along with others including willingness to learn and to teach others
- > Ability to read and understand technical drawings and documents as well as to write technical reports.
- > Consciousness for safety at work

We offer

- > a dynamic and attractive work environment
- > varied responsibilities within a small team
- > room for individual impact & manifold possibilities to make a difference
- > a range of long-term development opportunities
