

COMMITMENT. SOLUTIONS. EXPERIENCE.

COMMITMENT. SOLUTIONS. EXPERIENCE.

- **Committed to exceptional customer service**
- **Independent**
- **Quality and Service oriented**
- **Lower total cost**

Every customer is unique with respective service needs. AST Turbo is committed to customer aligned solutions to meet individual objectives. AST Turbo supports customers in operating rotating equipment at peak reliability while minimizing operating cost. The way to achieve this goal is often very particular and depends on a range of factors. AST Turbo is aware of this diversity and with the experience on board has the ability to support from various angles. We always seek an open dialog early in the project to ensure the service solutions are customer specific and properly aligned.

Markets Served

- Petrochemical plants
- Refineries
- Oil & gas plants
- Fertilizer installations
- Industrial installations
- Power generation

The background of the page features a large, detailed image of a turbine component, likely a compressor or turbine section, being worked on in a factory. The component is metallic and has a complex, multi-bladed structure. It is positioned vertically, with its base resting on a large, circular, metallic support structure. Several workers in blue uniforms and white hard hats are visible around the component, indicating a large-scale industrial operation. The factory environment is brightly lit, with overhead lights visible. The word "COMMITMENT." is overlaid in red, bold, sans-serif font on the left side of the image.

COMMITMENT.

AST Turbo is a proudly independent business, staffed by experts in all aspects of turbomachinery service. Our unique track record was accumulated over a range of diverse assignments and offers added value to our customers project after project.

We entrust and empower our people and, given their unique level of experience, they enjoy considerable responsibility. We continuously train and develop their competencies based on individual strengths and needs.

AST Turbo is able to make decisions quickly by way of our short chain of command. This also translates directly into the way we work: we enjoy a lean management structure and a refreshing absence of bureaucracy. Furthermore we believe in continuous improvement and thus follow a structured regime in all aspects of our business. Being owned by key staff that all have thorough Field Service experience, you are never more than a phone call away from a decision maker at AST Turbo – a decision maker that supports you in carefully evaluating risks, benefits and challenges ahead.

SOLUTIONS.

Scheduled Turnarounds

- Planning & Preparation
- Project Management
- Execution
- Turnkey
- QAQC

Engineering Services

- Upgrades and Modifications
- 3rd party Inspections
- Repair Support
- Spare Parts Support
- Asset Management
- Training

Field Service

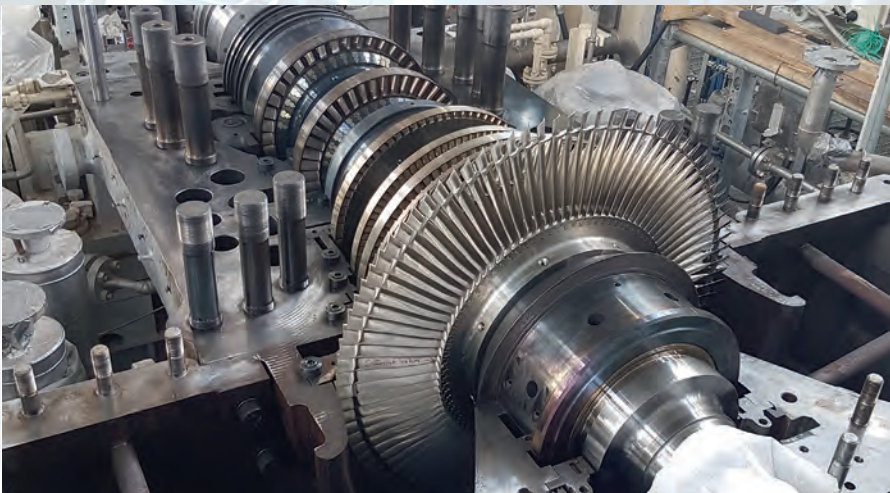

- Emergency Call-out
- Troubleshooting
- Periodic Diagnosis
- Field Supervision

New Installation

- Planning
- Construction / Installation
- Commissioning
- Start-up Support

EXPERIENCE.

Equipment Served

Critical rotating equipment

- Centrifugal compressors API 617, API 672
- Multi stage steam turbines API 612, API 611
- Axial compressors API 617
- Gear boxes
- Support systems and controls

Tooling System

- Modular
- Workshop around machines
- Lean access to tooling
- Lean control

Our team

- Experts with unique track record
- Experienced and thoroughly trained
- Backed up by Technical Support Organization
- Dedicated & passionate
