

AST Turbo is an independent service provider company in the Hydrocarbon Processing Industry and the Energy sector. Our employees provide services on critical rotating equipment to some of the biggest companies of the world within the Oil & Gas and Energy sector. Headquartered in Altendorf (SZ), Switzerland, the firm has an office in Houston (TX) and several agencies all over the world.

We are a young, internationally oriented and innovative company with a flat management structure and quick decision-making. Our strength and our success result from the combination of long-term orientation and entrepreneurial thinking at all levels. We are looking for employees with passion and commitment who want to shape the future in the Rotating Equipment Industry with us.

To strengthen our team, we are looking for a

Site Manager – Turbomachinery Turnarounds

Job Information

The Site Manager – Turbomachinery Turnarounds will provide after sales services at customer sites. The AST Site Manager – Turbomachinery Turnarounds is responsible for leading and managing the on-site activities of multi-equipment turnarounds of critical rotating equipment at customer's sites in the Oil & Gas and Energy Industry. This role will work together with the Field Operations Team and report to the Field Service Manager. The Site Manager – Turbomachinery Turnarounds is called to:

- Be the main interlocutor to the customer during the preparation, execution and close-out of the assigned project.
- Lead the planning and preparation of turnaround projects, working together with the Field Operations team.
- Support on the alignment of sub-contracted services and logistics, as part of the project preparation.
- Lead the briefing and de-briefing of the Field Service personnel assigned to the project.
- Lead and manage the on-site daily interaction with AST personnel and sub-contractors.
- Track and report project progress and costs, including handling of variation orders and re-work claims.
- Lead the project close-out activities, both internal and external.
- Promote the development and implementation of best practices and lessons learned.
- Support on field service assignments, as Service Engineer, based on business requirements and upon agreement with the Service Manager.

Education / Experience

For this position, you will have at least 08 years of field service experience in the servicing of critical rotating equipment or 03 years in a similar role on field services in rotating equipment, preferably gained with an OEM, or an independent service provider in the Oil & Gas, or Energy Industry. Ideally, you have a technical apprenticeship amended with a bachelor's degree in mechanical engineering (or equivalent technical qualification).

Special Requirements

- Resident in EU or Switzerland, with CH or EU passport
- Excellent communication & interpersonal skills and ability to lead and manage a team
- Customer and service focused attitude
- Self-motivated, with the ability to work independently
- Honest and loyal (long term employment expected)
- Good skills in MS Office (Word, Excel, Power Point)
- Fluent language skills in English, spoken and written
- Fluency on French and/or Spanish language is a plus
- Willingness to travel (international, short and long-term assignments), approx. 160-180 days worldwide
- Relevant professional experience in the Oil, Gas and Energy sector
- Ability to read and understand technical drawings and documents as well as to write technical reports
- Mechanical aptitude and skills
- Consciousness for safety at work

We offer

- A dynamic and attractive work environment
- Varied responsibilities within a small team
- Room for individual impact & manifold possibilities to make a difference
- Range of long-term development opportunities
