

2018 Turnaround - Turnkey Execution Services

SCOPE **AST Turbo overhauled 07x Elliott centrifugal compressors on turnkey basis as part of a Turnaround event at a customer site. AST Turbo's scope of supply included site management, hands-on technical supervision, supply of qualified rotating equipment engineers and state-of-the-art tooling. The transparent and friendly approach toward the customer led to the solving of technical issues identified as the inspections were carried out.**

CUSTOMER BENEFIT The detailed preparation efforts done by the AST Turbo project team, added to the know how on the overhauled machines led to an on-time, quality-assured execution.
The transparent and friendly approach toward the customer led to the solving of technical issues identified as the inspections carried out.
